Updated: Automatically every 30 minutes during business hours, and every 3 hours overnight. No login required — just open the link.

What This Is

The Operations Command Center is a live map of the Phoenix Metro that shows every active job in JobTread, every lead in the GoHighLevel sales pipeline, all nine service zones, every supplier location we use, and live crew locations — all in one place.

Reading the Map

Job & Lead Pins

Symbol	Color	Meaning
● Circle	Green	JobTread — Active Production Phase (job underway)
● Circle	Purple	JobTread — Sold Project Intake Phase (sold, not yet active)
◆ Diamond	Orange	GHL — Appt Booked
◆ Diamond	Pink	GHL — Consultation
◆ Diamond	Blue	GHL — Proposal
◆ Diamond	Red	GHL — Permitting

Click any pin to open a popup with the full details — name, address, service zone, status, and a direct link to open that record in JobTread or GoHighLevel.

Service Zones

The shaded polygons across the map represent our nine service zones (Z1 through Z5B). Every job and lead popup tells you which zone that address falls in.

Crew Locations

When crew members have their iOS tracking Shortcut enabled, their live locations appear on the map as colored dots with their names. You can toggle the crew layer on or off from the left sidebar.

Filtering the Map

Use the **filter chips** along the top toolbar to show or hide specific categories:

- **JT ▼** — toggles all JobTread jobs on/off. Click individual chips to filter by status.
 - **GHL ▼** — toggles all GHL pipeline leads on/off. Click individual chips to filter by stage.
 - **Zone chips (Z1, Z2A, etc.)** — click any zone chip to show only pins within that zone.
-

Using the Search Bar

Type any of the following into the search bar at the top of the map:

- **A supplier name** (e.g., “SiteOne”, “Floor & Decor”, “Aquatec”) — the map flies to that pin and highlights it.
 - **A job name or client name** — flies to that job or lead pin.
 - **A street address** — geocodes the address, drops a pin, and tells you which service zone it falls in. Use this to quickly zone-check any address a customer or subcontractor gives you.
-

Left Sidebar: Dashboard & Controls

The left sidebar contains your main operational controls and data:

1. **Live Dashboard:** Shows a real-time count of jobs and leads by category.
 2. **Weather Risks Today:** Alerts you to any active NWS weather warnings or high precipitation risks for the day.
 3. **Weather Overlay:** Toggle the live precipitation radar ON/OFF.
 4. **Live Data Refresh:** Click the  button to force an immediate fetch of the latest jobs and leads from JobTread and GHL.
 5. **Crew Layer:** Toggle live crew locations ON/OFF.
 6. **Map Legend:** A quick reference for what each pin color and zone means.
-

Right Sidebar: Supplier Layers

The right-hand panel lists all supplier categories. Each is **OFF by default** to keep the map clean. Toggle any layer ON to show those locations as pins.

Icon	Meaning
★ Gold Star	Showroom — walk-in, client-facing, product displays
◆ Diamond	Supply / Distribution — contractor pickup, not a showroom
💧 Water Drop	Pool & Fountain supplier
🌿 Leaf	Nursery
🔥 Fire	BBQ / Outdoor Living

All ON / All OFF buttons at the top of the panel toggle every supplier layer at once.
